
A Project about communication with only four letter words in times which are dominated by short messages and emoticons

Idea

My husband told me just 100 words had been enough to communicate living in London years ago. Words he used mainly came out of songs he knew that time.

Method

Write 100 four letter words on paper and post every day 10. Except the real one.

Material

- 40 wooden lockers, partly open, partly closed
- Paper 20 x 20 cm, pen black, different checklists (see below)
- 1 Paper saying: „Please take your word !“
- Frontdesk for reception, signpost with opening hours (see page 1)

Time

Starting 2014 - 08 - 14
End 2014 - 08 - 21

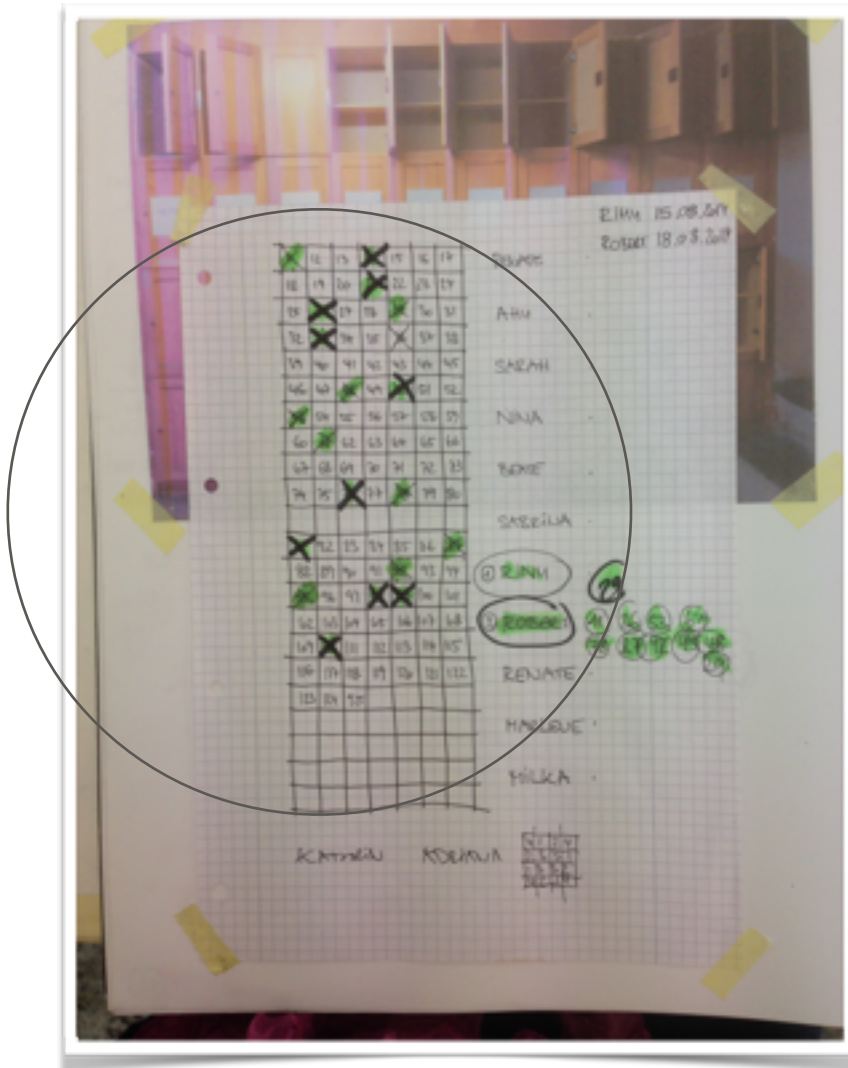

PROCESS

Daily I ask one person in the drawing class to give me ten numbers between 11-122.

Number 1-10 were the first ten words in my mind and I used them on first day.

Checklist and documents

1. When room is controlled and notice about all gone words
2. Daily report with person and chosen numbers and words (see pic. below)
3. Daily report of remaining words (see pic. below)
4. Report of words found in other spaces (see pic. below)
5. Report of guests, visitors and temporarily users (see pic. below)
